

# Important Topics Revision Guide

Class XI Economics | Based on the supplied chapter-weightage image and the attached Indian Economic Development notes PDF.

## How to use this guide

Start with the 6- and 5-mark IED chapters, then cover the 4- and 3-mark chapters. The attached notes cover Indian Economic Development (IED), not the Statistics chapters.

## Priority by chapter weightage

| Priority | IED chapter                                          | Marks | Revision focus                                                                 |
|----------|------------------------------------------------------|-------|--------------------------------------------------------------------------------|
| 1        | Liberalisation, Privatisation, Globalisation         | 6     | 1991 crisis; LPG reforms; policy changes; effects and criticisms               |
| 1        | Poverty                                              | 6     | Meaning and measurement; causes; anti-poverty approaches and programmes        |
| 1        | Environment and Sustainable Development              | 6     | Environment functions; carrying/absorptive capacity; sustainability strategies |
| 2        | Rural Development                                    | 5     | Credit, marketing, diversification, organic farming                            |
| 3        | Indian Economy 1950-1990                             | 4     | Planning goals; Green Revolution; industrial and trade policy                  |
| 3        | Human Capital Formation in India                     | 4     | Human vs physical capital; education, health and challenges                    |
| 4        | Indian Economy on the Eve of Independence            | 3     | Colonial impact on agriculture, industry, trade and infrastructure             |
| 4        | Employment, Growth, Informalisation and Other Issues | 3     | Employment types; formal/informal work; unemployment                           |
| 4        | Comparative Development: India and its Neighbours    | 3     | Compare India, China and Pakistan; reforms and indicators                      |

**Weightage check:** IED chapters total 40 marks; Statistics accounts for the other 40 marks. The attached PDF does not contain the Statistics chapter notes.

## First priority: 6- and 5-mark chapters

Prepare long answers with a definition or context, explained points under headings, examples or policy measures, and a short conclusion.

### Liberalisation, Privatisation and Globalisation | 6 marks | Notes pp. 14-18

- Why reforms began: balance-of-payments pressure, foreign-exchange shortage, fiscal stress and the need to open the economy to competition.
- Liberalisation: reducing controls and licensing; reforms in industrial, financial, tax, trade and investment policy.
- Privatisation: greater private-sector role, including disinvestment of public enterprises. Know objectives and concerns.
- Globalisation: integration with the world economy through trade, investment, technology and services.
- Likely answer: explain the 1991 crisis and reforms, then assess benefits and concerns such as competition, efficiency, inequality or dependence.

### Poverty | 6 marks | Notes pp. 19-25

- Meaning: inability to meet basic needs. Lived effects include hunger, ill health, poor educational outcomes, limited opportunities and debt.
- Causes to explain: underdevelopment/low productivity, unemployment and underemployment, unequal distribution, social barriers and population pressure.
- Approaches: promote growth and employment; targeted poverty-alleviation programmes; provide minimum basic services and amenities.
- Likely answer: define poverty, explain causes, describe broad approaches and evaluate why growth alone may not reach everyone.

### Environment and Sustainable Development | 6 marks | Notes pp. 43-46

- Four functions: supplies resources; assimilates waste; sustains life and biodiversity; provides aesthetic services.
- Limits: carrying capacity (resource use within regeneration limits) and absorptive capacity (waste within ability to absorb it).
- Sustainable development meets present needs while protecting future generations' ability to meet theirs.
- Strategies in the notes: non-conventional energy; LPG/biogas in rural areas; CNG in urban transport; solar and wind power; organic farming and resource-conserving practices.
- Likely answer: define sustainability, explain environmental pressures, then connect strategies to lower depletion or pollution.

### Rural Development | 5 marks | Notes pp. 32-35

- Rural credit: explain why affordable, timely institutional credit matters to farmers and rural enterprises.
- Agricultural marketing: know defects such as inadequate storage and weak market access; describe improvements such as regulated markets, cooperatives and infrastructure.
- Diversification: allied activities and non-farm work can raise income and reduce risk.
- Organic farming: benefits and constraints; connect it to chemical-input use, soil/environment quality and transition/market challenges.
- Likely answer: organise under credit, marketing and diversification; explain livelihood benefits.

## Next: 4- and 3-mark chapters

These chapters carry 22 marks combined. Use compact answers with clear comparisons, examples and key terms.

### Indian Economy 1950-1990 | 4 marks | Notes pp. 8-13

- Planning goals: growth, modernisation, self-reliance and equity. Define and illustrate each.
- Agriculture: land reforms, Green Revolution (HYV seeds, irrigation and fertilisers), food-grain self-sufficiency, and consequences.
- Industry/trade: Industrial Policy Resolution 1956, public sector, small-scale industries, import substitution and tariffs.
- Prepare: objectives/achievements of planning; pros and cons of import substitution; Green Revolution effects.

### Human Capital Formation in India | 4 marks | Notes pp. 26-31

- Human capital is knowledge, skills and health embodied in people; distinguish it from physical capital such as machinery.
- Sources: education, health, on-the-job training, migration and information; explain links to productivity.
- Prepare the role of education and health, public/private provision, and challenges such as unequal access and inefficiency.

### Indian Economy on the Eve of Independence | 3 marks | Notes pp. 5-8

- Colonial policy served British economic interests: India supplied primary goods and imported manufactured products.
- Review agriculture (stagnation and land systems), weak industrial base, foreign-trade pattern and infrastructure.
- Assess colonial impact in 3-4 headings with specific evidence from the notes.

### Employment, Growth, Informalisation and Other Issues | 3 marks | Notes pp. 36-38

- Know self-employment, regular salaried work and casual work; distinguish workforce/labour force if asked.
- Formal/organised vs informal/unorganised work: job security, benefits and conditions.
- Prepare unemployment types, underemployment/disguised unemployment, and growth-employment links.

### Comparative Development: India and Neighbours | 3 marks | Notes pp. 47-49

- Compare India, China and Pakistan by strategy, growth pattern and selected demographic/social indicators.
- China: Great Leap Forward, Cultural Revolution and 1978 reforms. Pakistan: mixed economy, import substitution and Green Revolution.
- Use the same indicators for each country and interpret the comparison; avoid listing figures without meaning.

## Statistics chapters in the weightage image (40 marks)

| Statistics chapter           | Marks |
|------------------------------|-------|
| Presentation of Data         | 8     |
| Measures of Central Tendency | 8     |
| Collection of Data           | 7     |
| Correlation                  | 5     |
| Organisation of Data         | 4     |
| Index Numbers                | 4     |
| Introduction to Statistics   | 2     |
| Use of Statistical Tools     | 2     |

The attached notes PDF is for IED and does not supply these Statistics topics. Highest weightage is Presentation of Data and Measures of Central Tendency.

## Answer plan and final checklist

Use the command word in the question to decide how much detail to write.

### For 6-mark answers

Give a one-line definition/context, 4-6 explained points under headings, one example or policy where relevant, and a brief conclusion.

### For 5-mark answers

Give 4-5 distinct points. Explain each briefly and connect it to development or livelihoods.

### For 3-4-mark answers

Answer directly: define, distinguish, compare, or give causes with short explanations. Keep points separate.

### For comparisons

Use the same indicators for each country or policy. End with the main difference or lesson.

### For data and examples

Memorise figures your teacher/textbook expects. Some source-note scheme and country statistics may be time-sensitive; check current class material before quoting.

## Weightage snapshot

| Chapter group                            | Marks   |
|------------------------------------------|---------|
| Statistics (8 chapters)                  | 40 / 80 |
| Indian Economic Development (9 chapters) | 40 / 80 |
| Total shown                              | 80      |

## Source note

Chapter names and marks were transcribed from the supplied "Scheme of Work XI Economics" image. IED revision points were condensed from the attached Hsslive Class XI Indian Economic Development notes PDF (2024); internal PDF pages are listed beside each chapter above. This is a weightage-led revision aid, not a replacement for the complete syllabus or teacher guidance.

Revise the Statistics chapters too: the image assigns them the same 40 marks as IED.
